Technology and Installations

www.altechgroup.com

The ALTECH GROUP was born from the fusion of its technical experience acquired in the mechanical, electrical and electronical fields, and got involved in this project with the purpose of supplying its customers with advanced technology and quality, concentrated in a single referent.

The Company is based in Alba (Cuneo) and all its operating structure (Technical Office, Commercial Office, and Production) are located in Roddi (Cuneo) and Potenza.

In the sphere of the industrial and technological process, our company offers itself as a partner to materialize the lines, installations and machinery needed for the elaboration of products in the food industry, according to the Turnkey methodology.

Technology and Installations

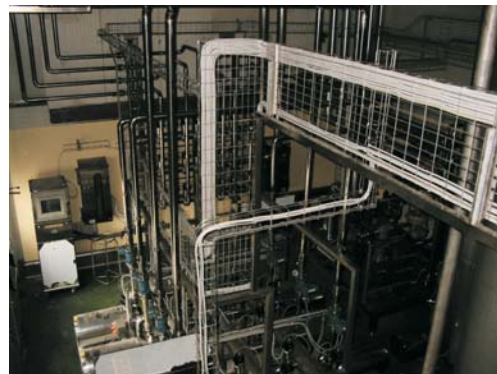

In addition to this, our production range includes:

1. Stocking, transportation, dosification, mixing and treating facilities for semi-finished products.

2. Purifying and sterilizing systems for technical installations.

3. Plants for primary and secondary treatment of processing fluids

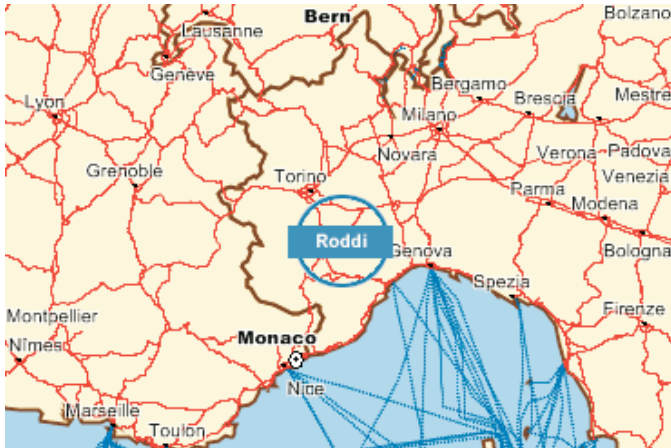

Technology and Installations

The internal structure is prepared to follow the entire process, starting by the projects developed at the Technical Office. Leading technology is used to allow a detailed quality control of each production phase, from the starting up to the certification, including the automated management of the production unit, paying special attention to regulating and counting process.

- Installations with own supplied and coordinated personnel
- Technical Consulting to installations done by other companies
- Technical Support and Certifications, in Italy as well as in foreign countries
- Technical Assistance for launching products and systems to the market
- Measurements and Surveys
